

INSTRUCTIONS FOR USE

*Cannacals™ High Heat Transfers for
Baked Goods, Taffy, Toffee,
Caramel, Gummies and Other
High Heat Foods*

Baked Smart is dedicated to bringing safety and awareness to the cannabis industry by offering Cannacals™, the original safety symbol, because packaging and labeling are not the solution! Made in the USA. Cannacals™ High Heat Transfers are images printed on acetate sheets, using color only. Cocoa butter is not used in this product, extending the shelf life and making it easy to ship, store and handle.

Instructions for Use with Baked Goods:

1. Place Cannacals™ High Heat Transfer Sheet with textured side face up in the pan.
2. Pour batter or place dough onto the Cannacals™ High Heat Transfer Sheet.
3. If using a dough ball, make sure to flatten dough to prevent spreading. NOTE: Dough can spread image in cooking process.
4. Bake as directed in recipe.
5. Allow at least 2 minutes for baked product to cool before removing items from acetate backing

Instructions for Use Gummies, Candies, Caramel, Taffy and Other High Heat Products:

1. Place Cannacals™ High Heat Transfer Sheet with textured side facing up in pan/mold.
2. Pour hot liquid over the Cannacals™ High Heat Transfer sheet.
3. Allow product to set, and then carefully remove the backing sheet starting at a corner and lifting carefully.

Helpful Tips:

- There is no need for parchment paper when baking with Cannacals™ High Heat Transfer Sheet. The acetate sheet doubles as a silicon baking pad.
- If making cookies, it is important to slightly flatten the dough ball prior to baking to prevent spread of the image.
- Allow freshly baked items to cool at least two minutes before removing from acetate backing. Cooling can be in either the baking sheet or the Cannacals™ High Heat Transfer Sheet can be transferred to a cooling rack for cooling.
- Cut sheet as needed.
- For candy items or full pan items, when removing the Cannacals™ High Heat Transfer Sheet, slowly lift backing sheets starting from the corner.
- If the image is not adhering to the product when lifting the backing sheet, press down and rub the smooth side of the backing sheet to make sure the image has adhered then slowly peel from the corner.

Storage:

Keep the unused sheets sealed in the plastic bag when not in use. Store your finished product as normally required for food safe handling. Cannacals™ Transfers will not affect the shelf life of your finished product and are freezer, refrigerator and shelf-stable.
